Notes

1. The applicable voltage range is 220V, 380V to 480V for 60Hz applications. For other voltages, please consult factory .

2. This generating set is of fixed speed of 1800 rpm.

3.KC1150 is the prime power rating of the generating set is wher e a variable load and unlimited hour usage ar e applied with an average load factor of 80% of the prime rating over each 24-hour period. Noting that a 10% overload is permitted for 1 hour in every 12-hour operation.

4.KC1275S is the standby power rating of the generating set is wher e a variable load limited to an annual usage up to 500 hours is applied, with 300 hours of which may be continuous running. Noting that no overload is permitted.

5. This rating level at voltage 220/380 is achieved when upsizing alter nator to LSA50.2M6
